A stylish, sit-stand table for creative meetings. The triangular tabletop with rounded corners creates a harmonious, relaxed impression, while the transition to the square shape of the legs adds an eye-catching angular twist to the table design. The straight lines of the legs in combination with the white pigmented tabletop in ash wood give the table a chic elegance.

Plectrum takes center stage in rooms where you enjoy spending a lot of time with colleagues and friends. The elegant design gives Plectrum added versatility, allowing it to double as a dining table at home as well.
